

BYRDINE F. LEWIS SCHOOL OF NURSING AND HEALTH PROFESSIONS

Clinical Instructor/ Clinical Assistant Professor (non-tenure track) Health Informatics Program

The Byrdine F. Lewis School of Nursing and Health Professions invites applications and nominations for the position of Clinical Instructor/Clinical Assistant Professor (non-tenure track) in the Health Informatics program. Candidate is to be a part of a growing interdisciplinary undergraduate and graduate certificate programs who will teach, contribute to student recruitment and advisement, participate in scholarly activities, and is involved in school, university and community service.

Minimum qualifications include: 1) master's degree in a clinical discipline or IT related field of study (Ph.D. or other terminal degree preferred) 2) two years of teaching experience at the college/university level; 4) health IT or health informatics experience and 4) service and scholarly record commensurate with the rank of clinical instructor or clinical assistant professor. Effective written and verbal communication skills are required. Responsibilities include teaching in the discipline of health informatics, advising students, assisting in program assessments and reports, and assisting the program director in growing the program offerings to include a graduate degree.

The Health Informatics bachelor's program was developed to meet the workforce needs for health information professionals in a dynamic health care system. Teamwork is essential in the workplace, and is used in the educational preparation of HI students. This program combines formal coursework with opportunities for community-based experiences and projects. Faculty provides an atmosphere of learning, and supports professional development in the health information field. This is the only interdisciplinary health informatics program in the U.S. Courses are taught by faculty in the Byrdine F. Lewis School of Nursing and Health Professions and in the Robinson College of Business in the departments of health administration and computer information systems. Faculty are comprised of experts in the area of HIE, telehealth, change management, EHR implementation, quality and safety, data analytics, project management, and health law and policy. The program has a diverse student body composed of traditional and second career students.

The Lewis School is one of eight colleges that comprise the dynamic and innovative Georgia State University. At 100 years old, Georgia State has a highly diverse student enrollment of over 32,000 and over 50 nationally and internationally ranked programs. Atlanta offers an ideal setting for GSU's urban research mission. The University is strategically located in downtown Atlanta and is only 10 minutes from the world's busiest airport, blocks from the State Capitol and the largest public health hospital in the Southeast, and close to the Centers for Disease Control and Prevention and the American Cancer Society. The Lewis School houses undergraduate and graduate programs in nutrition and respiratory therapy and a doctoral program in physical therapy in addition to nursing. Interdisciplinary professional education is a strong component in the college.

Competitive compensation package. Nominations are encouraged. Completed applications, including a letter of application, vitae, and contact information for professional references, should be emailed to LTGoodfellow@gsu.edu. Reference log# 17-123. Confidential review of applicants will continue until the position is filled.
